

Pedscapes

PneumoADIP - *www.preventpneumo.org*

This is the website of the pneumococcal vaccines accelerated development and introduction plan, based at the Johns Hopkins Institute of Public Health and funded by GAVI(Global Vaccine Alliance). This site contains details about pneumococcal disease and various vaccines available. Latest news and web resources on pneumococcal infections are also listed in this site.

RAPPID - *www.rappid.org.uk*

Raising awareness of pediatric pneumococcal infection and disease. As the name suggests, this website provides information about the disease and vaccines to patients and healthcare professionals.

'RAPPID' also contains sections on personal experiences on pneumococcal infection, and guidelines(UK) on prevention and treatment of meningitis.

Cells Alive - *www.cellsalive.com*

Cells alive is a large online collection of digital images of various types of cells. The collection is organized into cell biology, microbiology, immunology and microscopy sections. Interactive models on the cell cycle and cell division can be downloaded and used in presentations.
