Tata Memorial Center

(<http://tmc.gov.in/index.htm>)

Tata Memorial Center is one of the leading cancer treatment and research centers in the world. The TMC website provides information on various types of cancers, research being carried out, guidelines on management of various types of cancers, interesting case reports and various academic programs.

Johns Hopkins Cancer Center

(<http://www.hopkinskimmelcancercenter.org/m>)

The pediatric oncology section of this website contains a large collection of information material for parents of children with cancer. Publications, clinical trials and research can also be accessed from this website.

Pediatric Oncology Resource Center

(<http://www.acor.org/ped-onc/>)

This is a website for parents and families of children with cancer. The website provides information on various cancers, treatments available, family support and web resources.

Children's cancer web

(<http://www.cancerindex.org/ccw/index.htm>)

The Children's cancer web is a web directory of resources on pediatric oncology. The resources have been well classified and serve as a 'one-stop' source of information on pediatric oncology.
