

Pedscapes

Hypertox - www.hypertox.com.

This is the website of the Hypertox, a software that can be used for emergency management and training in toxicology. Three versions are available - for the web, for the PDA and the PC version. The trial version is free and can be used for 30 days.

Toxnet - <http://toxnet.nlm.nih.gov>

This is a comprehensive website on toxicology and hazardous chemicals from the National In-

stitutes of Health, USA. The website contains toxicology fact sheets, antidotes against a large collection of toxins, training manuals and a separate section on household poisons.

Toxicon multimedia project - <http://www.uic.edu/com/er/toxikon/>

The Toxicon is a website of a medical toxicology consortium. This site contains a section on virtual toxicology cases, a toxidrome review, antidotes to common poisons and links to toxicology sources on the web.
