

YOUNG INVESTIGATOR AWARD-Maternal and Child Health

For young medical postgraduates with a strong aptitude for research and a desire to grow into independent clinical research investigators

Duration*: 3 years

The Translational Health Science and Technology Institute (www.thsti.res.in) invites application for the young investigator award to strengthen the pool of physician scientists in the country. The aim of the award is to provide rigorous, high quality training for hypothesis driven innovative research in **maternal and child health**, with the goal of learning to drive a research process.

The potential research domains are:

- (i) discovery research linking classical epidemiology with molecular mechanisms for clinical benefits,
- (ii) systems biology approach to solving important clinical and public health problems
- (iii) epidemiological studies to expand understanding of disease,
- (iv) interventional studies to identify effective diagnostics or preventive/therapeutic interventions, and
- (v) implementation science, or novel technology for interventions.

Ph.D. programs are feasible, and if selected, the duration* may be extended by 2 years

Please visit <http://www.thsti.res.in/notification-rolling-jobs.php#> for details of application.
