WEB FIG. 1 EEG (Electroencephalography) showing runs of vertex waves (arrow) observed in normal stage II NREM sleep.

WEB FIG. 2 EEG (Electroencephalography) showing Classical hysarrythmia with chaotic background with high voltage epileptiform discharges (arrow).
WEB FIG. 3 EEG (Electroencephalography) showing generalized interictal epileptiform discharges (arrow) (4-4.5 Hz) on photic stimulation in a child with Juvenile myoclonic epilepsy.

WEB FIG. 4 EEG (Electroencephalography) showing Rolandic centropontual spikes with tangential dipole (arrow).
**WEB FIG. 5** EEG (Electroencephalography) showing left temporal interictal epileptiform discharges (arrow) in a child with left mesial temporal sclerosis.

**WEB FIG. 6** EEG (Electroencephalography) showing generalized epileptiform discharges (arrow) in periodic interval in subacute sclerosing panencephalitis.
