Management of the High Risk Infant Beyond Survival

Author
Sudha Chaudhari
Consultant, Department of Pediatrics
Terre Des Hommes Rehabilitation and
Morris Child Development Centre, King Edward
Memorial (KEM) Hospital, Pune, Maharashtra, India

Price: ₹1495/-

Salient Features

» A practical and detailed guide on how to do a close follow-up of the 'high-risk' infant, right from the time of discharge from the neonatal intensive care unit (NICU)

» Describes not only the methods of diagnosis and the various tests used for it in detail, but also suggests the therapeutic regime

» Deals with physical, mental, cognitive, visual, auditory and orthopedic problems encountered in such babies

» Provides guidelines for their management, based on the vast experience of the author and her colleagues in this field

» A ready-reckoner for pediatricians, neonatologists and therapists
